01 · Executive summary

Employee-enabled takeover of a dormant account with layering through accounts the same employee opened

EMP-0417 used an expired override to changed A-5520's contact details after hours; █14.70 L left 47 min later into accounts EMP-0417 opened.

Priority P1 — 6 dimensions High (Transaction, Employee behaviour, Access, Network, Temporal, Relationship), evidenced by 7 independent systems, no alibi, funds still recoverable → P1

Attribution: Attribution to a person is not established — credential compromise has not been ruled out

06 · Alibi analysis

EV-111 [C2] Alibi unexplained: 0 of 5 reasons found. No ticket for this customer in the 72 h before; Customer is not in this employee's portfolio; No queue item assigned for this account

EV-114 [C2] Alibi unexplained: 0 of 5 reasons found. No ticket for this customer in the 72 h before; Customer is not in this employee's portfolio; No queue item assigned for this account

EV-117 [C2] Alibi unexplained: 0 of 5 reasons found. No ticket for this customer in the 72 h before; Customer is not in this employee's portfolio; No queue item assigned for this account

07 · Prosecution argument

Transaction: HIGH — ■14.70 L to 3 new payee(s) from a dormant account; 3 transfers at 98%–98% of the ■5 L per-transaction limit within 6 min (supports: EV-101, EV-102, EV-122, EV-123, EV-124)

Employee behaviour: HIGH — first session after 20:00 in 90 days; navigation bottom 0.1% for role (supports: EV-108, EV-109)

Access: HIGH — no ticket, portfolio, queue or interaction; outside any rostered shift; override used; entitlement past its intended expiry (supports: EV-103, EV-111, EV-114, EV-117, EV-105)

Network: HIGH — 64% of the payout moved on within the chain; money looped back; recipients belong to a mule cluster (supports: EV-125, EV-127, EV-126, EV-128, EV-129)

Temporal: HIGH — access → money in 47 min (supports: EV-105, EV-106, EV-108, EV-109, EV-101)

Relationship: HIGH — 2 recipient(s) opened and KYC-approved by EMP-0417; C-45228 matches EMP-0417's HR address (supports: EV-101, EV-102, EV-129)

Historical: LOW — 0 prior alerts; 4 years' tenure (supports: —)

Warrant: ALIBI v1.0 + G2 v1.0 + M1 v1.0 + M2 v1.0 + M5 v1.0 + NEEDLE v1.0 + R2 v1.0 + R3 v1.0 + R4 v1.0 + R7 v1.0 + R9 v1.0

08 · Defence argument

The customer asked for the change — refuted: No ticket, IVR call, branch token or eKYC for C-88213 in the 7 days before

Authorised extended duty (camp or overtime) — refuted: EMP-0417 was not on any roster at the time

Someone else used the employee's credentials — open: Session came from the employee's own issued device — IT forensics needed before attributing to the person

The customer set up these payees — refuted: Payees were added from a never-seen device after the staff-side change

09 · Missing evidence

- Branch CCTV and biometric attendance are not ingested
- Customer C-88213 not yet contacted through a verified channel
- Device forensics on the session device pending

10 · Control recommendation

Expire temporary entitlements automatically — The override would have lapsed at its intended expiry

11 · Audit history
